SOLAR PANEL PALLETS
Handled

4,000+ lbs
INVERTERS
Stored Securely

Crossdocks, Storage & Logistics (CSL) partnered with a renewable energy solutions provider specializing in utility-scale solar infrastructure projects to provide scalable warehousing and logistics support for a large-scale solar energy project in North Carolina. To support the operation, CSL also secured additional trailer capacity through a Bailey trailer lease program to accommodate overflow storage and staging requirements during peak inbound activity.

CLIENT CHALLENGE

The company required a warehousing partner capable of managing high-volume solar equipment distribution for a fast-paced renewable energy project.

CSL SOLUTION

- ✓ Flatbed and trailer unloading
- ✓ Freight scanning and inventory tracking
- ✓ Product staging and outbound order fulfillment
- ✓ Trailer loading operations
- ✓ Forklift and warehouse associate support as needed
- ✓ Inventory reporting and physical inventory audits
- ✓ LPN labeling and pallet put-away

OPERATIONAL REQUIREMENTS

Handling 1,174 oversized solar panel pallets

Coordinating inbound and outbound freight

Daily inventory reports

Securely storing high-value solar modules and 4,000+ lb inverters

Flexible storage capacity and scalable labor support to meet changing project demands

RESULTS DELIVERED

Scalable operations that supported project demands

Secure management of critical renewable energy assets

Accurate inventory and real-time visibility

Flexible labor support to meet changing needs

Reliable logistics execution and on-time delivery

NEED FLEXIBLE WAREHOUSE SPACE?

Whether your project involves renewable energy, industrial equipment, manufacturing, or oversized freight, CSL has the nationwide network and expertise to help.
